

CareAway

A WORLD OF CARE

COVID-19 also known as coronavirus is spreading rapidly and threatening to become a pandemic. - How prepared is your team?

With the spread of COVID-19 potentially becoming a pandemic, the hospitality industry will want to minimize exposure to its workers and guests. The use of Telemedicine is one way to reduce the spread of the virus by reducing the potential of person to person infection while guaranteeing clients a safe, secure and reliable contact with a doctor or other healthcare professionals.

CareAway is a worldwide Telemedicine provider for travelers. Our Telemedicine Platform, uniquely dedicated to the Travel and Hospitality industries, provides secure and reliable Telemedicine services for travelers worldwide. Our platform remotely connects patients, general practitioners, medical specialists, pharmacies, and Infectious Diseases specialists to evaluate and treat patients. This limits exposure to staff and other guests while improving access to care by providing near real-time tele-consultations in the comfort of a guest's hotel room.

CareAway is conscious of the impact that the spread of COVID-19 will have on hotels and the hospitality industry in general. This impact is not only financial but physical and psychological when it comes to the concerns about the wellbeing of hotel guests and employees.

CareAway wants to partner with you as you prepare to tackle these concerns. To do this, we are offering our Telemedicine Platform without a subscription fee to hotels and other businesses for the first three months. This will provide hospitality facilities with a tool that allows them to be fully equipped - during their busiest period - to offer their guests the means to reach out to a medical provider remotely, within minutes.
